OCCUPATIONAL SKILLS REQUIRED BY USSR,
AS INDICATED BY NEWSPAPER ADVERTISEMENTS
1 - 30 June 1952

This report presents information on occupational skills required by the USSR during the period 1 - 30 June 1952, taken from advertisements in 16 Soviet newspapers received by FDD in June 1952. Of the three similar reports that have preceded this one, the report for 1 - 30 June 1951 was used for comparison purposes.

25X1A

These advertisements do not imply that other occupational skills are not required in the USSR. They do, however, indicate one source of manpower supply which is being tapped to provide certain occupational needs. There are undoubtedly other means of recruiting manpower. Insofar as these are successful, it can be assumed that recourse to newspaper advertising would be unnecessary. The advertisements that do appear may therefore in some measure reflect either breakdowns in planning or reveal situations of an emergency nature for which provisions had not been made.

Only a few organizations of the very many that advertised in June 1951 advertised for workers in June 1952. Thus, Zagotstroydetal' Artel in June 1951 advertised in Vechernyaya Moskva for various construction workers on as many as four different occasions. Not a single employment advertisement, however, was inserted by the same organization in 1952. By the same token, added significance may be attached to those organizations which continue to recruit personnel by means of newspaper advertising.

The advertisements in this report are grouped under nine main regional divisions, four of which have additional subgroups. In most of the republics, the same organizations advertised in 1952 as did in 1951. This is not true, however, for the Baltic area and the North and "out-of-town" group (those recruited in the various cities for work "out of town").

Technical and engineering personnel, as well as skilled and construction workers, continue to be in demand, a trend observed in the June 1951 report.

25X1A

25X1A

S-E-C-R-E-T

Newspapers used in compiling this report and the abbreviations used are as follows:

Trud (T), Moscow
Vechernyaya Moskva (VM), Moscow
Moskovskaya Pravda (MP), Moscow
Sovetskaya Estoniya (SE), Tallin
Sovetskaya Latvija (SL), Riga
Sovetskaya Litva (SLi), Vil'nyus
Sovetskaya Belorussiya (SB), Minsk
Leninskoye Znamya (LZ), Petrozavodsk
Kazakhstanskaya Pravda (KP), Alma-Ata
Kommunist Tadzhikistana (KT), Stalinabad
Zarya Vostoka (ZV), Tbilisi
Sovetskaya Moldaviya (SM), Kishinev
Kommunist (K), Yerevan
Sovetskaya Kirgiziya (SK), Frunze
Pravda Vostoka (PV), Tashkent
Turkmeneskaya Iskra (TI), Ashkhabad

This report differs from previous ones on the same subject in that it provides the address of each organization when given by the paper. The advertisements themselves vary a great deal in content. One organization may remain unnamed, offering only a listing of its personnel requirements and a telephone number to call. At the other extreme is the organization which identifies itself as to name and address and which, in addition to enumerating the personnel required, offers inducements, sounds a note of urgency, and specifies what wages it is prepared to pay, the duration of the work, whether it is piecework, and whether it is permanent or temporary.

RSFSR

Moscow

Two advertisements recruiting personnel for work in the Moscow area appeared in Moskovskaya Pravda; all other advertisements were carried by Vechernyaya Moskva. The four advertisements which represent other RSFSR oblasts were found in Trud.

1. Planning and Construction Enterprises

The following personnel are needed in Moscow by planning and construction enterprises and institutes.

Giprolesprom (State Planning Institute
 for the Timber Industry) Komsomol'skaya
 ploshchad' 1/a.

Draftsmen, tracers, typists.
 Permanent work on piece-
 work basis. (VM, 23, 26 Jun)

ILLEGIB

25X1A

S-E-C-R-E-T

Planning Bureau, ul. Lenivka, d 1

Engineers and technicians; technologists for construction materials; construction designers; thermotechnicians; mechanics; electricians; sanitary engineering workers; geologists, prospectors. Permanent work in Moscow. (VM, 26, 30 Jun)

Mosproyekt (Moscow Planning Institute) ul. Gor'kogo, 8.

Head of the planning office; engineers, economists, planning engineers, construction designers for water lines, sewerage, heating ventilation, and boiler installations; electricians, technologists for garage planning, estimators; technologists, superintendent of the machine department, sanitation technicians; architectural technicians, draftsmen; fitters, machinists; carpenters; charwomen. (VM, 2 Jun)

Giproriaba (State Fish Planning Institute of the Ministry of Fish Industry USSR), Verkhnyaya Krasnosel'skaya, 14

Construction engineers (designers); hydrotechnical engineers (sea and river); large-scale surveyors; engineer-geologists, to head groups; chiefs of industrial prospecting parties. (VM, 30 Jun)

Proyektor Artel of the Moscow Metal Products Union, Klementovskiy pereulok, 12

Chief of the experimental shop; senior foremen and inspection foremen; foreman of the paint shop; construction superintendent; charwoman. (VM, 19 Jun)

Giprovodkhoz (State Planning Institute for Water Resources, Ministry of Agriculture USSR, telephone: K 2-91-95

Architect for general planning; sanitary engineer, road engineer; engineers and technicians for construction and designing; electrical engineers, geodesists, geologists and hydrogeologists; engineers, technicians, and estimators; bookkeepers. (VM, 17 Jun)

General Planning Institute, Kuznetskiy Most, 3

Architects, engineers, economists for city planning; engineers and technicians for planning city transport; railroad workers, railroad engineers; station attendants, thermotechnicians for outside heating pipelines. (VM, 24 Jun)

Central Installation Administration, telephone: Zh 4-16-08

Construction engineer familiar with the installation of metal structures, for the position of sector chief; experienced cashier. (VM, 26, 30 Jun)

Unidentified organization, ul. Razina, 7, 2d floor, room 35

For work in Moscow and out of town: construction engineers, architects; sanitary technicians, road builders; designers; hydrotechnicians, building technicians; bookkeepers for auditing work. (VM, 6 Jun)

25X1A

S-E-C-R-E-T

Glavkhlopkostroy /Main Administration
for the Construction of Cotton Industry
Enterprises/ Sadovaya-Samotechnaya, 1

Head bookkeepers and chief engineers
for contract construction and instal-
lation administrations; senior
bookkeepers and senior engineers
for construction sectors in Moscow,
and in districts and rayons of the
North Caucasus and Crimea.
(VM, 9, 20 Jun)

Construction Scientific Research
Laboratory, ul. L. Tolstogo, 16

Laboratory chief; engineers and
construction technicians; dupli-
cating-machine operators; mis-
cellaneous workers. (VM, 4 Jun)

Office of Special Construction Materials,
Main Administration of Railroad Construction
of the West, Ministry of Railways, Tri-
fonovskaya ul., dom 21, Rizhskiy Railroad
Station

Engineers and technicians in in-
dustrial and civil construction,
for: superintendents, construc-
tion foremen, and chief of the
production division. Permanent
work. (VM, 24 Jun)

Construction Administration of the
Gidromekhanizatsiya Trust, Semenovskiy
val, 10-a

For work in Gor'kovskaya Oblast:
chief of the planning division;
assistant head bookkeeper; labor
relations and wage specialist;
for work in Moscow: hydrotech-
nical engineers. (VM, 4, 6)

2. Heavy Industry

Plant imeni Budennyy, Ministry of
Automobile and Tractor Industry,
Borovaya ul. 7

Engineer-technologist; equipment
design engineer; chief of the
capital construction division;
superintendents; thermotechnical
engineer as chief of the boiler
shop; heat engineer; tool engineer;
safety engineer; engineers spe-
cializing in norm-setting and
questions relating to labor and
wages; foreman of the technical
inspection division; inspectors;
head bookkeeper. (VM, 20 Jun)

Kuntsevskiy Chrome Leather Plant,
Kuntsevo, Skolkovskoye shosse

Construction engineer as head of
the capital construction divi-
sion. (VM, 3 Jun)

Shchelkovo Sheet Rolling Mill, Shchelkovo
(Moskovskaya Oblast) Yaroslavskiy Railroad,
village of Zhegalovo

For supervisory work: experienced
construction and mechanical engi-
neers. Living quarters provided.
(VM, 12, 20, 24 Jun)

Ministry of Electrical Industry, telephone
E 1-80-49

Molders; typists; miscellaneous
workers; loaders. (VM, 27, 30 Jun)

Moscow Pipe-Casting Plant, Letnikovskaya
ul. 10

Metallurgical engineers; pyrometric
engineers; molders; miscellaneous
shop workers. (VM, 12 Jun)

(VM, 26, 30 Jun)

Mosenergostroymekhanizatsiya
(Construction and Mechanization
Trust under the Moscow Regional
Electric Power Administration)
Moscow, 141, Plekhanovskaya ul., 25-b

Excavator operators; bulldozer opera-
tors; drivers; mechanics for repair-
ing dredging machines, tractors, and
motor vehicles; turners; geodesists;
superintendents of mechanized earth-
work; foremen; mechanical and con-
struction engineers; technicians;
mechanics, and constructors; senior
bookkeepers; secretary-typist. (VM, 4 Jun)

Tsentropromelektropech' Trust (Central
Trust for the Electric Furnace Industry),
ul. Krasina, 1/23

Experienced technical supply chief,
familiar with electrical materials;
chief of the assembly shop, special-
izing in electric-furnace building;
engineer-technologist for cold work-
ing of metals; construction engineers
and technicians; mechanics of the 4th
through 7th categories. (VM, 26 Jun)

3. Educational Institutions

Moscow Institute of Steel imeni I.V.
Stalin of the Order of the Red Banner,
Moscow, 49, B. Kaluzhskaya ul., 6

Announces competition for positions in
the following departments: mathematics -
docent; physics - assistant professor
and docent; analytical chemistry -
docent, machine-building descriptive
geometry and drafting - docent; general
machine-building (theory of mechanisms
and machines, machine components, hoist
and transport machinery) - professor or
assistant professor and docent; electri-
cal engineering - docent; theory of
metallurgical processes - professor, de-
partment head, courses in "metallur-
gical furnaces" and control and measur-
ing instruments - docent; courses in
metal rolling - docent; courses in
safety engineering - docent; courses in
cold processing of metal - docent;
economics and organization of ferrous
metallurgy production - assistant pro-
fessor. Competition will last one
month (VM, 4 Jun)

languages - docent, as department head;
calculating machines - professor, as
head; Marxism-Leninism - professors and
docents; higher mathematics - one pro-
fessor, four docents, one assistant;
physics - one professor, four docents,
one assistant; graphics and descrip-
tive geometry - one docent; foreign
languages - two docents; theoretical
mechanics - one professor, one docent;
theory of mechanisms and machines -
one docent; thermotechnical department -
one docent; electrical engineering -
one professor, one docent; organization
of production - one docent; precision
mechanics - two docents; calculating
machines - one professor, one docent;
theoretical physics - two docents; ex-
perimental physics - one professor, two
docents; electronics - two docents; auto-
matics and telemechanics - one docent;
metallurgy - one docent. Competition
ends 25 Jun 1952 (VM, 4 Jun)

Institute of Mining, Academy of
Sciences USSR, telephone: V 1-74-08

For work with explosives: junior sci-
entific associates (mining engineers,
engineer-physicists) and a senior labora-
tory assistant. (VM, 4 Jun)

Academy of Municipal Services imeni
K. D. Pamfilov, Kuznetskiy Most, d 9

Competition for replacements to fill
vacancies as scientific research di-
rectors in the following sectors;
housing development, city landscaping,
and sanitation engineering. Also, for
permanent work: senior scientific as-
sociates in the fields of electrical
equipment, city transport, automatics,
and head of the academy's postgraduate
division (VM, 4 Jun)

Geophysics Institute, Academy of
Sciences, B. Gruzinskaya ul. 10

Junior scientific assistant (acoustics);
engineer (specialist in radio receivers);
research worker (radio technology).
(VM, 3 Jun)

All-Union Correspondence Agricultural
Tekhnikum, Zagorsk, Moscow Oblast
Ptitsegrad

As directors of various divisions,
those having experience in teaching:
soil-improvement engineers; hydraulic
engineers; agricultural and forest en-
gineers; veterinarians; mechanical en-
gineer, bookkeeper-economist. Permanent
work. (MP, 3 Jun)

UKRAINIAN SSR

Pravda Ukrainy, the only Ukrainian newspaper available in FDD during June, though regularly received, did not carry a single advertisement. The only advertisement for employment in the Ukrainian SSR appeared in Trud. The Nikopol' Metallurgical Tekhnikum of the Ministry of Ferrous Metallurgy USSR advertised for engineering instructors to teach drafting, strength of materials, and courses in the field of construction. A statement was made that the work would be permanent and that living quarters would be provided. The address was Nikopol', Dnepropetrovskaya Oblast, ul. Antipova, 5.

BALTIC AREA

There was a noticeable decrease in the advertisements which appeared in the three Baltic newspapers in June 1952. The 1951 report shows that 115 organizations advertised a total of 169 times while in 1952 83 organizations advertised 113 times. This reflects a decrease of 28 percent in the number of organizations seeking personnel, and a drop of 33 percent in the total number of advertisements published.

Advertisements seeking workers for several aspects of railroad transportation in the Estonian SSR were on the increase in 1952, with six different organizations in search of personnel, as against only one in 1951. Paralleling the 1951 report, most of the advertisements for the Baltic area in 1952 call for skilled construction and technical personnel. Organizations representing the local, light, and communal industries are predominant. Requests for office personnel are also rather abundant.

Estonian SSR

The following personnel are needed in the Estonian SSR by various organizations.

1. Construction and Installation Organizations

Construction and Installation Office,
Tallin, ul. Lomonosova, 49

Bricklayers, plasterers; mechanics;
plumbers; tunnel cutters; reinforced-
concrete workers; loaders and miscel-
laneous workers (SE, 11, 12, 26, 28 Jun)

Railroad Construction Office Estonian
Railroad System, Tallin, ul. Lay, 43

Construction foremen, bricklayers; track
workers; miscellaneous workers; me-
chanics for the installation of metal
structures. Payment is progressive
piece rate. Single persons will be
provided with workers' dormitories.
(SE, 11 Jun)

turned lathe operators; toolmakers
and machinists; foundry workers.
(K, 27 Jun)

CENTRAL ASIA

The total number of organizations seeking personnel by means of newspaper advertisements in Central Asia showed only a negligible decrease in 1952. In 1951, 69 organizations advertised 84 times, while in 1952, 74 advertisements were published by 64 organizations. Advertisements recruiting engineers and skilled construction and technical personnel continue to predominate, and, in the case of the Turkmen SSR, show a marked increase. The incidence of advertisements relating to installation, geological surveying, mining, local industry, and irrigation also continues to be high.

- 22 -

S-E-C-R-E-T

ILLEGIB

25X1A

S-E-C-R-E-T

On the whole, employment advertisements in Central Asian newspapers were less frequently repeated by a given organization as compared with advertisements appearing in newspapers representing other regions of the USSR. One of the few advertisements which was repeated, however, called for workers and supervisors specializing in explosives. The advertisement was run by the Kazakh Land Development and Blasting Office, which may indicate the development of new agricultural regions when viewed in conjunction with an advertisement inserted in the same week in the Kazakhstanskaya Pravda by the Alma-Ata Inter-Obast Office of Land Management of the Ministry of State Farms Kazakh SSR, which advertised for land-management engineers, geodesists, geobotanists, hydraulic engineers, and agronomists.

Kazakh SSR

The following personnel are needed by various organizations in the Kazakh SSR.

Ministry of Fish Industry, Alma-Ata, ul. Uzbekskaya, 71	Fishing experts; economists; head and senior bookkeepers; chief of capital construction; construction workers. (KP, 6 Jun)

ADVERTISEMENTS FOR WORK IN THE NORTH AND "OUT OF TOWN"

Though still offering inducements in the form of higher pay and other privileges, the number of advertisements for work in the North has dropped off almost to the vanishing point. Only one advertisement appeared which specifically indicated work in the North. It appeared in Zarya Vostoka on 18 June and was repeated on 25 June in the same newspaper. Without specifying the organization seeking personnel, the advertisement called for engineers and technicians in the fields of geology, mining, and construction. Also in demand were automobile mechanics, electricians, diesel-engine technicians, economists, and specialists in various branches of medicine. As in the 1951 advertisements for work in the North, the age limit was set at 45. Inducements were in the form of "higher pay and other privileges." Employment was on a 3-year contract basis. (ZV, 18, 25 Jun)

There was also a sharp decrease in 1952 in the number of advertisements seeking personnel for "out-of-town" employment on a contract basis. Only two such advertisements were found. An unidentified organization listed its need for personnel in the following job categories: mining engineers and technicians; geological engineers and technicians; prospectors; surveyors; hydrogeologists; diesel engineers; and, construction technicians and engineers. In addition to medical workers, doctors classified as therapeutists and phthisiologists were also in demand. The advertisement appeared in the Lithuanian SSR newspaper Sovetskaya Litva and listed four addresses to which applicants might apply. These were: Vil'nyus, ul. Yu. Yanonio, 2; Kaunas, ul. Donelaychio, 13; Klaipeda, ul. Montes, 37; and, Shyaulyay, ul. Marite Mel'nikayte, 76. (SLi, 24 Jun)

The only other advertisement for "out-of-town" employment, also by an unidentified organization, appeared in Vechernyaya Moskva on 3, 20, and 27 June. The Moscow address given was: Gogolevskiy bul'var, 14. The following were in demand: engineers and technicians; mine surveyors; soil enrichers; mineralogists; petrographers; geophysicists; geodesists; hydrologists; and topographers. Also needed were: automobile transport workers; electricians; thermotechnicians; mining mechanics; norm-setters; diesel operators; hydraulic engineers; road builders; specialists in industrial materials; timber specialists; economists; planning engineers specializing in accounting; finance specialists; chiefs of machine-accounting stations; shop superintendents; foremen; mechanics for machine-accounting stations; machine bookkeepers; cartographers; specialists in maritime, river, and aviation transport; medical doctors of various specialties; nurses; postal-telegraph workers; teletypers; chief and senior bookkeepers; polygraphic workers, including typesetters, imposers, stereotypers, and printers. The list concludes with librarians, typists, warehousemen, and drivers of classes one to three. (VM, 3, 20, 27 Jun)
